PROJECTS

Turkish Oral Narrative Search Engine | *Python, pandas, BeautifulSoup*

Dec 2024–May 2025

- Built a command-line search engine for a school project that indexed 1,000+ folktales from Texas Tech University's Archive of Turkish Oral Narrative (ATON) and ranked results by relevance using TF-IDF.
- Automated bulk collection of the archive's documents with BeautifulSoup, replacing manual file-by-file downloads.
- Used pandas to build term and co-occurrence matrices and analyze word relationships within context windows.

Glossy (SteelHacks XIII) | *Python, Linux MCP Server, CRIU, NVIDIA Brev* | [Devpost](#)

Sep 2026

- Collaborated on a two-person hackathon team to build an AI-assisted Linux debugging tool that inspects servers through read-only access using Linux MCP Server.
- Tested proposed fixes on a clone of the server built from a disk snapshot and a CRIU checkpoint, so the production system stays untouched.
